wearable protective masks

CleanSpace™

wearable protective masks

FILTER OPTIONS

Cleanspace™ is available with a broad spectrum of Combination Gas and Vapour filters and the option of a High Capacity TM3/P3 Particulate filter (offering 4 times the capacity of our standard TM3/P3 filter). The uniquely designed combination filters are certified to TM3/P3 particulate protection enabling Cleanspace™ to continue to be the only half mask product on the market to offer such high levels of protection. The High Capacity TM3/P3 Particulate filter gives a cost effective alternative for applications where users are exposed to high levels of particulates.

THE FULL RANGE OF FILTERS ARE COMPATIBLE FOR USE WITH ALL MODELS OF CLEANSPACE™ WITH THE USE OF THE FILTER ADAPTOR (PAF-0038).

The addition of these filters allows Cleanspace™, with its unique benefits and innovative technology, to be used in a wider application base including particulate, organic, inorganic and acid gas and vapours, commonly seen in the industrial work place. The new filters are available now.

APPLICATIONS
IN MAJOR
INDUSTRIAL
SECTORS

	PRODUCT CODE	BARCODE	PRODUCT NAME	WEIGHT	PRODUCT DESCRIPTION
	PAF-0050	934666800 032 9	Cleanspace™ Combination Filter EU: TM3 A1 P SL R	200g	A combination filter for protection against organic gases and vapours (eg. solvents with a boiling point higher than 65°C) and mechanical and thermally generated particles including dusts, mists and fumes generated by welding, grinding and sanding
	PAF-0051	934666800 033 6	Cleanspace™ Combination Filter EU: TM3 ABE1 P SL R	200g	A combination filter for protection against organic gases and vapours (eg. solvents with a boiling point higher than 65°C), Inorganic gases and vapours and Acid Gases. Mechanical and thermally generated particles including dusts, mists and fumes generated by welding, grinding and sanding
	PAF-0037	934666800 022 0	Cleanspace™ Hi Capacity (HI CAP) Particulate Filter TM3 P SL R / PAPR P3	120g	High capacity particulate filter with four times the surface area of Cleanspace™ standard particulate filter; High efficiency; pleated fiberglass filter; Suitable for use against solid and liquid particulates including dusts, mists, fumes, fibres, bacteria and viruses
	PAF-0038	934666800 021 3	Cleanspace™ Filter Adaptor	105g	Cleanspace™ Filter Adaptor is designed to be fitted easily to the Cleanspace™ respirator to allow gas filters and TM3/P3 Hi Capacity filter to be used. The Adaptor comes with a hex key
	PAF-0035	934666800 006 0	Cleanspace™ Particulate Filter EN12942 TM3/P3 HEPA (pack of 3)	115g	Particulate filter; High efficiency; pleated fiberglass filter; Suitable for use against solid and liquid particulates including dusts, mists, fumes, fibres, bacteria and viruses
	PAF-0036	934666800 007 7	Cleanspace™ Pre-filter (pack of 10)	12g	Thin, light particulate woven pre-filter; High quality; Flame retardant pre-filter; Extends the life of the Cleanspace™ particulate filters
